## CULI THE LISTENING LIBRARY

The CULI Listening Library is a collection of listening comprehension tapes which are available to individuals and institutions.

### **SERIES 1.**

15 twenty minute tapes aiming to give systematic and reinforced practice in listening for detail and identifying main topics. Each tape contains all instructions, questions, listening passages and answers. Units 1 to 5 are suitable for M.S. 4 to 5 students whereas Units 6-15 would be for undergraduates and general adult students of English.

### **SERIES ONE**

Tapes Required Copying Charge  
Complete Set  
(Units 1-15)  
4 x 900' tapes 340 Bht  
or (including scripts)  
8 x C60  
or  
4 x C90  
Individual Units 15 Bht  
(including script)

### **SERIES 2.**

46 unscripted accounts by native speakers of some memorable incidents from their lives. The stories are from 1-3 minutes in length. The aim is to give learners practice in listening to natural speech as spoken by native speakers of English (i.e. British, American, Australian etc.) Suitable for undergraduates and those about to further their education abroad. The tapes are accompanied by a full transcription of the stories plus a brief glossary.

### **SERIES TWO**

Tapes Required Copying Charge  
2 x 600' tapes 175 Bht  
or  
2 x C60 (including scripts)

**SERIES 3.**

20 five-minute talks. (10 British speakers, 8 American, 2 Canadian) In each talk an experiment, of general interest, is described by a native speaker, using notes but not reading. The aim is to give practice in listening to the kind of language and presentation typical of a lecture. A variety of topics are covered including Biochemistry, Physics, Engineering, Phonetics and many others. The talks range from 2-12 minutes in length and are especially suitable for graduate students and those planning to continue further studies abroad. The tapes are accompanied by a full transcription of the talks, plus a brief glossary.

**SERIES 4.**

20 short lectures by specialists, (native speakers of English) in particular disciplines, using notes, but not reading. These talks include such topics as Biochemistry, Physics, Engineering, Medical Science, History and Literature etc. Suitable for post-graduate students. These talks are accompanied by a full transcription and a glossary.

**SERIES THREE**

| Tapes Required          | Copying Charge      |
|-------------------------|---------------------|
| Complete Set            |                     |
| (1 x 900') + (1 x 600') | 200 Bht             |
| or                      | (including scripts) |
| (1 x C60) + (1 x C60)   |                     |

**SERIES FOUR**

| Tapes Required | Copying Charge      |
|----------------|---------------------|
| Complete Set   |                     |
| 4 x 900'       | 350 Bht             |
| or             | (including scripts) |
| 4 x C90        |                     |

**SERIES 5 & 6.**

20 short lectures by specialists covering the following main topics—Library Science, Medicine, Language Studies, Educational Technology, Education, Business Studies, Science and Technology. Suitable for advanced students. Tapes are available as a complete set or as separate subject disciplines and are accompanied by full transcriptions.

**CONVERSATIONAL ENGLISH**

65 short dialogues which illustrate the type of English that native speakers use in conversational situations. Stress and Intonation contour lines have been added to each of the sentences in the dialogues to help the advanced student to increase his ability to converse naturally in normal spoken English.

**SERIES FIVE AND SIX**

| Tapes Required        | Copying Charge                          |
